DETAILED ACTION

Response to Amendment

1. The arguments presented in the Response of January 26, 2004 have been carefully considered. The Section 102 rejection is withdrawn. The remaining rejections are, however, maintained for the reasons below.

Obviousness-type Double Patenting

2. Claims 1-79 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-57 of U.S. Patent No. 6,635,633, corresponding to Serial No. 09/927,188 relied upon in the last Office action. Applicants have indicated that this issues will be addressed upon indication of allowable subject matter in the present application.

Claim Rejections - 35 USC § 103

3. Claims 1-59 and 71-79 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Peignier et al., of record. Applicants' arguments have been considered but are not seen persuasive of error. While applicants' compounds have a linking group "G" which is defined as a C₃₋₆ alkylene group, the -C(R_a)(R_b)- linking group of the patent compounds is clearly encompassed thereby. Note that when R_a and/or R_b are alkyl groups, the overall linking group contains 3-6 carbon atoms. Other

substituted forms are also taught. Clarification that the present G group is a chain of 3-6 carbon atoms will overcome this rejection.

4. This rejection is not applied against species claims 60-70.

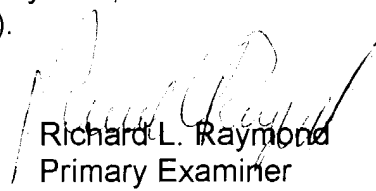

Conclusion

5. This rejection is not made final.
